

A hexagonal grid with a path of colored cells (yellow, orange, purple, pink) and black dots, resembling a stylized letter 'L' or a maze. The path starts at the top right and moves downwards and to the left, ending at the bottom left. The colored cells are arranged in a way that suggests a specific sequence or direction of movement.

A stylized, colorful, pixelated graphic of a large letter 'L' or a similar shape, composed of many small, overlapping circles in various colors (yellow, orange, red, purple, blue, green) against a black background. The shape is formed by a vertical stem and a horizontal base, with a small triangular extension at the top right. The circles are arranged in a grid-like pattern, creating a mosaic effect. The colors are vibrant and varied, giving the shape a dynamic and eye-catching appearance. The background is solid black, which makes the colorful shape stand out prominently.
